

HAZARD STATEMENTS:
H225 Highly flammable liquid and vapor
H302+H312+H332 Harmful if swallowed, in contact with skin or if inhaled
H304 May be fatal if swallowed or enters airways
H315 Causes skin irritation
H319 Causes serious eye irritation.
H335 May cause respiratory irritation
H411 Toxic to aquatic life with long lasting effects

PRECAUTIONARY STATEMENTS:
PREVENTION:
P210 Keep away from heat/hot surfaces/sparks/open flames and other
sources of ignition. No smoking.
P233 Keep container tightly closed.
P240 Ground and bond container and receiving equipment.
P241 Use explosion-proof electrical / ventilation/lighting/handling
equipment.
P242 Use non-sparking tools.
P243 Take action to prevent static discharge.
P261 Avoid breathing dust/fume/gas/mist/vapor/ spray.
P264 Wash hands and any exposed area thoroughly after handling.
P270 Do not eat, drink or smoke while using this product.
P271 Use only outdoors or in well-ventilated area.
P280 Wear protective impervious gloves/ OSHA approved eye
protection/face protection.

[^0]PRIMARY ROUTES OF EXPOSURE:
Skin contact, eye contact, and inhalation.
effects of ACUTE EXPOSURE:
EYES: Contact with eyes may cause irritation including burning, watering, and redness.
SKIN: Contact may cause mild skin irritation including redness, burning, and drying and cracking of skin. Continued exposure
may develop into dermatitis. Solvents can penetrate the skin and cause systematic effects similar to those under
inhalation symptoms. 2-Butoxyethanol may be absorbed through skin and produce toxic effects similar to those resulting
from inhalation exposure.
INHALATION: High vapor concentrations are irritating to the eyes and respiratory tract, may cause headaches,
dizziness, anesthesia, asthma, drowsiness, unconsciousness, and other central nervous system effects, and possibly death.
INGESTION: Can cause gastrointestinal irritation, nausea, vomitting and diarrhea. Small amounts aspirated into the
respiratory system during ingestion or vomiting may cause mild to severe pulmonary injury.

CHRONIC HEALTH EFFECTS:
Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage (Sometimes referred to as Solvent or Painter's Syndrome). Intentional misuse by deliberately concentrating and inhaling this material may be harmful or fatal. Chronic exposure may also cause damage to the respiratory system, lungs, eyes, skin, gastrointestinal tract, liver, spleen and kidneys. Repeated skin contact may cause persistant irritation or dermatitis.

## MEDICAL CONDITIONS GENERALLY AGGRAVATED BY EXPOSURE:

Conditions aggrevated by exposure may include skin disorders, respiratory (asthma-like) disorders, and pre-existing liver or kidney conditions.

= $=$ = $=$ = $========$ SECTION 5 - FIRE AND EXPLOSION HAZARD DATA
FLAMMABLE LIMITS IN AIR BY VOLUME- LOWER: 1.1
METHOD USED: TCC

EXTINGUISHING MEDIA:
Foam, CO2, or dry chemical is recommended. Water spray is recommended to cool or protect exposed materials or structures.

## SPECIAL FIREFIGHTING PROCEDURES:

Persons exposed to products of combustion should wear self-contained breathing apparatus and full protective equipment. Isolate danger area, keep unauthorized personnel out. Water may be ineffecive for extinguishment, unless used under favorable conditions by experienced fire fighters. Carbon dioxide can displace oxygen, exercise caution when using co2 in confined areas.

UNUSUAL FIRE AND EXPLOSION HAZARDS:
Vapors may be ignited by heat, sparks, flames, or other sources of ignition. Vapors are heavier than air and may travel considerable distances to a source of ignition where they may cause a flashback or explosion. If container is not properly cooled, it can rupture in the presence of excessive heat.

```
================== SECTION 6 - ACCIDENTAL RELEASE MEASURES
STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED:
Keep all sources of ignition and hot metal surfaces away from spill/release. Use explosion-proof non-sparking equipment. Stay upwind from area. Isolate danger and keep unauthorized personnel out. Stop source of release if possible with minimal risk. Wear appropriate protective equipment including respiratory protection. Prevent spill from entering sewers, storm drains, or any other unauthorized treatment drainage systems and natural waterways by diking ahead of the spill. Spilled material may be absorbed with an appropriate spill kit. Notify fire authorities and appropriate federal, state, and local agencies if required.
```

practice，wash thoroughly after handling，and do not wear contaminated clothing．
STORAGE INFORMATION：
Keep containers tightly closed．Use and store material in cool，dry，well－ventilated areas away from heat，direct sunlight，hot metal surfaces，and all sources of ignition．Post＂No smoking or open flame＂sign．Store only in approved containers．Keep away from incompatible materials（see section 10）．Protect containers against physical damage．Indoor storage should meet OSHA standards and appropriate fire codes．
OTHER PRECAUTIONS：
＂Empty＂containers retain residue，liquid and vapor，and may be dangerous．Do not cut，weld，pressurize，solder，drill， grind，or expose such containers to heat，flame，sparks，or other sources of ignition．They may expode and cause severe personal injury or death．All containers should be disposed of in an environmentally safe manner in accordance with all government regulations．

## $=============$ SECTION 8 －EXPOSURE CONTROLS／PERSONAL PROTECTION＝＝＝＝＝＝＝＝＝＝＝＝＝

RESPIRATORY PROTECTION：
Engineering or administrative controls should be implemented to reduce exposure．A NIOSH／MSHA approved respirator with an organic vapor cartridge should be used under conditions where airborne concentrations are expected to exceed exposure limits（See Section 2）．Use a positive pressure air supplied respirator if there is potential for uncontrolled release， exposure levels are not known，or any other circumstances where air purifying respirators may not provide adequate protection．

## VENTILATION：

If current ventilation practices are not adequate to maintain airborne concentrations below the established exposure limits，additional ventilation or exhaust systems may be required．Where explosive mixtures may be present，electrical systems safe for such locations must be used．

## PROTECTIVE GLOVES：

Prevent prolonged or repeated contact by wearing gloves impervious to solvents and other appropriate protective clothing．Launder contaminated clothing before reuse．
EYE PROTECTION：
Wear safety glasses to reduce eye contact potential．Chemical safety goggles（ANSI Z87．1 or approved equivalent）are appropriate if splashing is likely．Eye washes must be available where eye contact can occur．
OTHER PROTECTIVE CLOTHING OR EQUIPMENT：
A source of clean water should be available for flushing eyes and skin．Showers should be available if larger spills are possible．

## WORK／HYGIENIC PRACTICES：

Efforts should be made to minimize contact and spills．Always wash hands before eating，drinking，or smoking．Clean up spills promptly．Follow OSHA and company guidlines．

＝ニニニニニニニニニニニニニニニ＝＝＝＝SECTION 10－STABILITY AND REACTIVITY DATA＝＝＝＝＝＝＝＝＝＝＝＝＝＝＝
STABILITY：
Stable under normal conditions and handling．
CONDITIONS TO AVOID：
All possible sources of ignition．
INCOMPATIBILITY（MATERIALS TO AVOID）：
Avoid exposure to strong oxidizing agents and reducing agents．
HAZARDOUS DECOMPOSITION OR BYPRODUCTS：
Combustion may liberate toxic byproducts such as carbon dioxide，carbon monoxide，various oxides of carbon and nitrogen．
HAZARDOUS POLYMERIZATION：
Will not occur．
ニニニニニニニ＝二
SENSITIZATION：
None known．
CARCINOGENICITY：
There is no data available to indicate any components present at greater than $0.1 \%$ may present a carcinogenic hazard．
REPRODUCTIVE TOXICITY：
Date Revised：3／20／12 Date Printed：4／3／15

2－Ethoxyethanol has been suggested as a cause of male and female reproductive fertility effects，and testis damage． TERATOGENICITY（BIRTH DEFECTS）：
There is no data available to indicate any components present at greater than $0.1 \%$ may cause birth defects． MUTAGENICITY：

2－Butoxyethanol may cause blood disorders based on animal data．

```
=ニ=ニ=ニ=ニ=ニニ=ニ=ニ======== SECTION 12 - ECOLOGICAI INFORMATION ===================
ENVIRONMENTAL DATA:
Although no information is available for this specific product mixture, individual components may by themselves may have
ecological affects. Trimethylbenzene is a marine pollutant under 49 CFR 172.101.
```

This product is considered a RCRA hazardous waste due to the characterisic(s) of DOO1 (ignitability). Waste is subject
to the land disposal restrictions in 40 CFR 268.40 and may require treatment standards. Consult state and local
regulations to determine whether they are more stringent than the federal requirements.

Container contents should be completely used and containers empty prior to discarding．Container rinsate could be considered a RCRA hazardous waste and must be discarded in compliance with all applicable regulations．Larger empty containers，such as drums，should be returned to a professional drum reconditioner．To assure proper disposal of smaller empty containers，consult with state and local regulations and disposal authorities．
$======================$ SECTION 14 －TRANSPORT INFORMATION $====================$
SHIPPING NAME：
UN1139，Coating Solution，3，II

| STATE LISTED COMPONENTS | CAS NUMBER | STATE CODE ． |
| :--- | ---: | :--- |
| 2－Butoxyethanol | $111-76-2$ | CA，FL，IL，MA，ME，MN，NJ，PA，RI |
| Trimethylbenzene | $95-63-6$ | CA，MA，MN，NJ，PA |

[^0]:    * Chemical(s) that are chronic health hazards. Refer to section 3 for further information.
    + Toxic chemical(s) subject to the reporting requirements of section 313 of Title III and of 40 CFR 372 .
    ^ Hazardous Air Pollutant established by the EPA as directed by the Clean Air Act of 1990.
