Spray-Tek
Advantages

• Affordable
• Adds protection and resilience that concrete doesn’t provide
• Withstands harsh conditions
• Impact resistance, compression, and tensile strength are almost twice that of regular concrete
• Low product investment cost
• Small learning curve
• Added revenue from existing customer base
• Allows you to sell functionality of the product over concrete
• The SprayTek acrylic overlay system is so versatile you can match almost any style or look with one product
• Product not only beautifies, but improves existing concrete
